

Continuous Radon Monitor Testing

Radon results are available at the end of a 48 hour test period!

- No more waiting for results from a laboratory
- Testing can be scheduled to provide results at the time of Home Inspection
- Buyer/client receives results in an easy-to-read format on site at the time of the home inspection

No handling of radon vials!

- Continuous radon monitor takes the place of the radon vials for precise and accurate results
- No more handling or pick up issues that can hold up the transaction for the buyer, broker and seller

No more “forgotten” or “lost” radon vials!

- Test vials or results cannot be “lost in the mail”
- No more delay and confusion

Radon testing is available with a home inspection as a separate service. Call a Tiger representative today to schedule an appointment or for additional information.
